Novel partner performance: counterbalanced v1_matched / v2 / v3
Novel-partner round success (%)
v1_matched: commit at round start
v2: random start + switching
v3: chosen start + switching
Novel-partner episode return
Mean steps per 20-round episode
Diverse RNN + influence
Diverse MLP + influence
Single RNN + influence
Diverse RNN no influence
Dots: 5 trained seeds. Error bars: sample SD. Same 1096 layouts and counterbalanced schedule; each protocol retained.
