Final assignments by partner ability

Partner faster at red (speed-matching ego-red target: 0%)
Partner faster at blue (speed-matching ego-red target: 100%)

v1_matched | v2 | v3

MLP — Final ego-red assignment (%)
RNN — Final ego-red assignment (%)
RNN single-partner — Final ego-red assignment (%)
RNN no influence — Final ego-red assignment (%)

0 20 40 60 80 100

1 5 10 15 20
Round within partner episode

Thin lines: all five individual training seeds; thick lines: equal-seed means.
Partner color is complementary to ego assignment. Speed matching is a behavioral diagnostic, not a geometry-aware optimal policy.
